

KSi Model 12UB/16UB Underbin Conveyor

KSi Underbins provide clean, efficient, gentle transfer of seed from bins.

KSi Underbin Conveyors are built with high-quality materials and designed to handle seed gently and efficiently without cross-contamination, even at high capacities. KSi continues to innovate in this product line, improving capacity, increasing the maximum length, and adding accessible pans and doors for easy inspection and cleaning.

KSi Model 16UB Underbin Conveyor—Reversing Discharge End

16UB — Accessible Inspection / Clean-Out Pans

- Patented drive and dual-drive configurations and options
 - 200-ft+ options available
