

KSi Model 12UC / 16UC Undercarr Conveyors

Easily maneuver KSi Model 12UC and 16UC Undercarr Conveyors under hopper-bottom trailers and other low inlet points for efficient, economical transfer into longer conveyors.

KSi Model 12UC and 16UC Undercarr Conveyors fill the gap to transition from low inlet points up into traditional conveyor inlet hoppers (and higher with the KSi Model 12/16UC Extended).

- Very easy to maneuver
- Compact, high efficient design
- Adjustable axle for balancing capabilities
- Complete enclosed return
- Electric or hydraulic drive
- Extended models available for increased reach and height

KSi Model 12UC:

- Newly re-designed for 2017-18 season
- Single 12" crescent belt seamlessly carries material from inlet hopper to discharge spout
- 2,000 bu/hr
- Low profile, collapsible inlet hopper (30" wide x 60" long x 10" high)
- Discharge height is 24"

KSi Model 16UC:

- Single 16" crescent belt seamlessly carries material from inlet hopper to discharge spout
- 4,500 bu/hr
- Low profile, collapsible inlet hopper (30" wide x 72" long x 15" high)
- Discharge height is 36"
